

Ifeoluwase Adeleke

SOFTWARE ENGINEER

Profile

As a full stack software developer with almost three years of experience, I am a skilled and dedicated professional who is committed to creating high-quality, innovative solutions. My expertise lies in designing and developing web applications using ReactJS, NodeJS, ExpressJS, NextJS, and NestJS. I have a strong grasp of HTML5, CSS3, JavaScript and Typescript, which enables me to build user-friendly and responsive interfaces as well as efficient, scalable, and secure RESTful APIs.

Employment History

Software Engineer, Dancerapy.org, Surulere, Lagos

JANUARY 2023 —

- Worked closely with the dance and product teams to prioritize and implement new features and video patterns based on user feedback, resulting in a 30% increase in user satisfaction and a 10% increase in user retention.
- Developed a scalable architecture for video storage, enabling the company to handle a significant increase in the volume of videos uploaded on the platform without affecting performance or user experience.
- Successfully implemented a new video playing library that improved video play speed, resulting in reduced server load, reduced video buffering and improved user experience.
- Implemented a new payment system for video subscription that improved customer experience and reduced the number of unsuccessful transactions.
- Currently maintaining and managing the Dancerapy web application to fix issues reported by users and improving overall stability of the platform.
